Investor Expectation Score (I.E.)
Investors and company boards of directors have established targets for the five scoring measures that appear on pages 2 and 3 of this report. The I.E. score ranges from 0 to 120 (if all targets are exceeded by 40% or more). Click the Help button (upper-right) for more information.

Best-In-Industry Score (B-I-I)
The B-I-I score measures each company's performance relative to the best performing company on each of the five scoring measure. The B-I-I score ranges from 0 to 100. To score 100 a company must be the best performing company in the industry on all five scoring measures.

Weighted Average Score
The weighted average score combines the Investor Expectation Score and the Best-In-Industry Score using a 50%-50% weighting as specified by the course instructor. Detailed explanations of scoring are provided in the Help documents asociated with pages 1, 2, and 3 of this report.

Earnings Per Share

($ per share)

Earnings Per Share scores are based on a 20% (20-point) weighting. A bolded number indicates achievement of the investor expected EPS shown below each yearly column head. A highlighted number indicates best-in-industry performance. Game-To-Date EPS scores are based on a weighted average of the annual EPS performances.

Notes

Global demand for Y11-Y15 is expected to grow by 7%-9% annually, slowing to 5%-7% during Y16-Y20. The projected growth rates are not the same for all regions, as shown in the table on page 5 of the Player's Guide. Actual demand growth may vary from the forecast due to stronger or weaker competitive efforts on the part of rival companies.

Supply / Demand Analysis

Potential Footwear Supply in Year 13	
Beginning Year 13 Inventory	12,986
Potential Y13 Production (with OT)	102,900
Potential Global Supply	115,886

Expected Footwear Demand in Year 13	
Branded Demand Forecast	80,562
Private-Label Demand Forecast	10,098
Expected Global Demand	90,660

Analysis

Potential global supply (at max OT) in the upcoming year is 27.8% greater than projected global demand. This much excess potential supply is certain to greatly intensify competition for the next few years and reduce industry profitability. It is advisable to NOT add more production capability at this time.
